SUMMARY

CSE (AI & ML) student with a strong foundation in Python, Machine Learning, Data Science, Deep Learning, and Generative AI. Skilled in developing AI-powered applications, implementing ML models, analyzing data, and working with RAG and LLM-based solutions. Passionate about building practical and scalable AI solutions for real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Machine Learning: Supervised Learning, Unsupervised Learning, Classification, Regression, Feature Engineering, Model Evaluation

Data Science: Pandas, NumPy, Matplotlib, Data Cleaning, Exploratory Data Analysis (EDA)

AI & Generative AI: Generative AI, LLMs, Prompt Engineering, RAG, AI Agents

Deep Learning: PyTorch, Neural Networks, Hugging Face

Databases: MySQL, MongoDB, Qdrant

Cloud Technologies: AWS, Microsoft Azure, Google Cloud

EDUCATION

B.Tech in Computer Science Engineering (AI & ML) 2023 – 2027

Rajeev Gandhi Memorial College of Engineering and Technology | CGPA: 8.26

PROJECTS

OmniBrain: Agentic Multi-Modal RAG Orchestrator

LangGraph · Vision-Language Models · Python

- Architected a distributed, multi-agent orchestration system with a LangGraph supervisor agent to dynamically route and coordinate tasks across siloed data sources, emphasizing maintainable, reusable service design.
- Built a Text-to-SQL agent over historical stock data with query optimization, combined with vector-database semantic search for low-latency retrieval, producing accurate, cited outputs while mitigating hallucination.

Smart Helmet Detection System

Python · YOLO · Computer Vision

- Built a real-time helmet/no-helmet classifier using YOLO, applying algorithmic optimization and hyperparameter tuning to process live video streams with low latency at scale.
- Owned the project end-to-end — from ambiguous requirements gathering to dataset preprocessing, model design, and iterative accuracy improvement — including systematic test-case design to validate detection accuracy for real-world use cases.

INTERNSHIP EXPERIENCE

Data Science and Machine Learning Intern — AXLERO SOLUTIONS Jul 2026 – Present

- Built retrieval infrastructure for an agentic multi-modal RAG system for intelligent document retrieval, applying algorithmic and data-structuring techniques to organize large-scale unstructured data for fast, accurate retrieval — directly analogous to similarity search over large product catalogs.
- Deployed and configured a distributed Qdrant vector database using Docker on cloud infrastructure, designing collections for scalable, low-latency embedding storage and semantic similarity search.
- Collaborated cross-functionally with engineers using Git/GitHub and feature-based agile workflows to ship changes, tracking operational metrics to guide iteration.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- SQL Advanced – HackerRank
- Microsoft Certified: Azure AI Fundamentals
- UiPath Certified Professional Automation Developer Associate
- Digital Skills: Artificial Intelligence – Accenture
- Quantum Fundamentals Program – WISER, Qubitech & Amaravati Quantum Valley

ACHIEVEMENTS

- Competed in multiple AI/ML hackathons and competitive-coding contests, applying algorithmic problem-solving under strict time constraints.
- Completed a hands-on ROS workshop, gaining valuable practical experience in robotics and automation.

LANGUAGES

English, Hindi, Telugu
